NUTRITIVE NIGHT CARE  
2.53 FL.OZ

## MASSAGE: 4 GESTURES TO REJUVENATE FACIAL FEATURES

Apply the Nutritive Night Care Cream, then massage your face following these movements which plump up the oval of the face.

### **Stroking out over the forehead**

Place your fingertips together in the middle of your forehead, press firmly, and glide out to the sides. Lift the fingers off, returning to the starting position. Repeat three times.

### **Stroking around the eyes**

Place your fingertips at the sides of your eyes and stroke around the bony edge of the eye socket. Work up over the eyebrows, down the center of the nose, under the eyes, and back to the starting position. Repeat three times.

### **Stroking under the cheekbones**

Starting close to the nose, with your hands on the inner side of each cheek, make small circular pressure motions all the way out toward your ears. Give special attention to the area just under the ear, then massage back toward the nose. Repeat three times.

### **Stroking up from the chin**

Start with your hands on either side of your face; with your palms and fingertips, stroke slowly up the sides of the face and up to the forehead, then glide back down again lightly. Keep the pressure constant but not firm. Repeat three times.

Used as a mask, it improves the absorption of active ingredients and the elasticity of the skin, for smooth and firmer skin. Leave on for 15 minutes, then remove the excess with a cotton ball.
